**Conducted / attending date:** 10/9/2016

**Venue:** CSE Seminar HALL, Block 1

**Invited / Expert member delivered guest lecture:**

Prof Bhujanga Rao  
Professor,  
Sreenidhi College of Science and Technology

**Purpose of conducting guest lecture**

To provide deeper knowledge about Digital Signal Processing.

**How is it useful to students:**

Students were benefited by the presentation with pictures describing the filters, they got a nice practical application picture about Digital Signal Processing

# Presentation Outline

Introduction: What is Machine Design?

Machine Design: Research Areas

Research Applications:

- Gear Tooth FEM/FEA and Optimization
- Machine Design Optimization
- Customized Knee Implant: Design, Stress Analysis and Manufacturing

  
PRINCIPAL

# Knee Implant Example: Concluding Remarks

An implant design has been studied and redesigned to increase life of the implant

Initial stress analysis have been performed.

- Results are favorable for the new implant

Manufacturing of implant

- Rapid prototype model
- Investment casting model

Future work:

- Improve finite element model and analysis
- Parameterize and optimize

Machine design:

- Hinge joint, stress analysis, stress concentration, wear, manufacturing

Description

The Department of ECE is conductED a Guest Lecture on " Being a Smart Engineer" by **Dr. T P Sasikumar**, Ex. Deputy Director/Principal Director (Imagery Analysis), Directorate General of Security, Cabinet Secretariat, Delhi.

Do you have an analytical mind with a penchant for problem solving? If you're good at designing things and you want to make a lot of money, becoming an engineer might be the right move for you. Majoring in engineering and getting relevant work experience are key to setting down the path to becoming an engineer. Once you're sure engineering is the career for you, the sky's the limit.

Event Category Technical

Event Sub-category Not Available

The Department of ECE conducted a guest Lecture, on "**Electro Magnetic Interference and Compatibility**" by **Mr. Sandeep Satav, IIT Mumbai, RCI, Scientist.**

**Electromagnetic compatibility (EMC)** is the branch of electrical engineering concerned with the unintentional generation, propagation and reception of electromagnetic energy which may cause unwanted effects such as electromagnetic interference (EMI) or even physical damage in operational equipment. The goal of EMC is the correct operation of different equipment in a common electromagnetic environment.

Description EMC pursues two main classes of issue. **Emission** is the generation of electromagnetic energy, whether deliberate or accidental, by some source and its release into the environment. EMC studies the unwanted emissions and the countermeasures which may be taken in order to reduce unwanted emissions. The second class, **susceptibility** is the tendency of electrical equipment, referred to as the victim, to malfunction or break down in the presence of unwanted emissions, which are known as Radio frequency interference (RFI). **Immunity** is the opposite of susceptibility, being the ability of equipment to function correctly in the presence of RFI, with the discipline of "hardening" equipment being known equally as susceptibility or immunity. A third class studied is **coupling**, which is the mechanism by which emitted interference reaches the victim.

Interference mitigation and hence electromagnetic compatibility may be achieved by addressing any or all of these issues, i.e., quieting the sources of interference, inhibiting coupling paths and/or hardening the potential victims. In practice, many of the engineering techniques used, such as grounding and shielding, apply to all three issues.

**Report on the need for arranging a guest lecture on 'Map Your Future'.**

The faculty met with the HoD, S&H Department and expressed their dissatisfaction about the performance and behavior of students in general. The following points were discussed in the meet.

In the changing scenario of learning process, today's students need some sort of training to invigorate their mental abilities. Their learning should be helpful to carve a niche for themselves. The development process and initial outcomes of establishing any educational program could be to improve their marketing skills and the knowledge of contemporary career prospects. They should be able to establish relationships between what they have learnt in colleges and what they have to practice in society. Students are taking engineering courses without any goals or proper plan. They need to plan for their career. As teachers, the faculty felt the need for counseling the students. They wanted to help students plan for higher education by offering reliable guidance beyond the classroom. As academicians, the HoD and staff wanted to have the opportunity of building the gaps in students' career by arranging a guest lecture which may result in linkage bonds, thus improving the research-teaching nexus. The implementation of a structured guest lecturing program is to improve students' first-hand knowledge of contemporary practices. Guest Lecture is expected to enhance students' learning experience by providing current and relevant examples of the practical applications of the learnt subjects. The Head of the Department strongly opined that the pedagogical strategy of using guest lectures is a part of experiential learning and hence, can be organized in the college exclusively for students. Learners of all ages and experience levels are hungry for variety, and seeing a new face in front of the room can liven up the class. So, keeping the strength of 17 sections of students in consideration, it is resolved to split the sections into batches and guest lectures by eminent educationists are arranged for.

Finally, it is decided that IYr. CSE A&E , ECE C&E would get the benefit of listening to a Renowned Guest, Dr. Mantha Lakshmi, Assistant Professor, Dept. of English, Osmania University, Telangana.

**Report on a guest lecture on 'Map Your Future' by**

Dr. Lakshmi Mantha, Assistant professor of English, Osmania University  
Telangana. on 29-10-2016.

She is a proficient Teacher and an eminent speaker. She inspired the students with her oratory skills. Her lecture was enjoyable and opened the doors of challenging tasks for students. The learned speaker provided current and relevant examples of the practical applications of real- life picture of theory. She sought students input into the problems they face and proposed answers to them. She supplied a questionnaire contained both open and closed-ended (yes/no) questions. An in-depth interview was also conducted by the Guest Lecturer. In total, 240 students participated enthusiastically in answering their questionnaires. The Students were first asked whether they had any expectations of the guest lecture. The 60% of students who indicated they had expectations of the lecture were then asked to list their expectations. The responses of this open-ended question were analyzed and coded. The findings included expectations to learn about real world/practical applications and they appreciated the presentation style of the guest lecturer. The students ranked the guest lecturer highly and stated that the lecture was 'helpful', 'engaging', 'well prepared', 'knowledgeable' and other related positive comments. The speaker grabbed the attention of students in explaining how to Map their Future and helped the students to plan for higher education. The exponent speaker provided information about money management advice, counseling, Online and offline resources, college preparation, college selection, career exploration, and counseling aimed at helping students and families better understand student obligations and learn about practical management solutions to ensure healthy finances while in college and beyond. The lecture ended with a thoughtful quotation "We're not that much smarter than we used to be, even though we have much more information -- and that means the real skill now is learning how to pick out the useful information from all this noise.

Sir,

Greetings from Geethanjali College of Engineering & Technology!

I cordially invite you to deliver a lecture on "Applications of Differential Equations" for B.Tech I year I semester students on 5 th November 2016 at our college. Kindly accept our invitation and give your consent for the same.

Thanking you

Yours sincerely

Report

Mathematics Club of Freshman Engineering Department organized a Guest lecture on “**Applications of Differential Equations**” for B. Tech I year students from 1.30 pm to 4.00 pm on 08-11-2016 in Seminar Hall, Block-2 by an eminent speaker “**Dr. M. A. S. Srinivas, Professor and Head, Department of Mathematics, JNTUH, Hyderabad**”.

The session started with the introduction of Differential Equations and the speaker explained wide range of applications of differential equations in various engineering fields. The session was very interactive and all the queries were addressed. The feedback forms were collected from the students. 200 students attended the session.

### Letter of Appreciation

To,

A. Subramanyam, Asst. Prof.,  
Dept of ECE,  
Geethanjali College of Engineering and Technology.

The management of Geethanjali College of Engineering and Technology (GCET) would like to thank you for taking part in the Student Development Program on "Usage of Raspberry PI" to the students enrolled to the Innovation Club which is part of the Incubation Centre at GCET, conducted on 8<sup>th</sup> March 2017.

It is an honour that you are the resource person for the event. We believe that the knowledge you have shared with the students will help them immensely in their future project work and innovation thinking.

**SDP Usage Report**

Name of the SDP: Usage of Raspberry Pi

**1. Conducted Date: 08-03-2017**

**Venue: GCET**

**2. Expert member:**

A. Subramaniam,  
Asst. Professor,  
ECE Department,  
GCET.

**3. Contents Delivered:**

Basics of IoT.  
Introduction to Raspberry PI  
Introduction to Python programming  
Introduction to Some sensors  
Practical application on integrating sensors with Raspberry PI

**3. Purpose of conducting SDP:**

The institute has a incubation / innovation center which encourages students to work on inter-disciplinary projects.

The students needed IoT related know how in order to complete this task. Raspberry PI is one of the microcontroller which enables creation of IoT projects.

As the students of various branches do not have knowledge of the same, this workshop had to be conducted.

**4. How it is useful to students?**

To create Interdisciplinary projects.

**5. Outcome of workshop:**

Students of various branches can work on inter disciplinary innovative projects
