CCNAv7: Enterprise Networking, Security, and Automation

The learner has successfully achieved instructor level credential for completing CCNAv7: Enterprise Networking, Security, and Automation course administered by the undersigned instructor trainer. The learner was able to proficiently:

- Configure single-area OSPFv2 in both point-to-point and multiaccess networks.
- Explain how to mitigate threats and enhance network security using access control lists and security best practices.
- Implement standard IPv4 ACLs to filter traffic and secure administrative access.
- Configure NAT services on the edge router to provide IPv4 address scalability.
- Explain techniques to provide address scalability and secure remote access for WANs.
- Explain how to optimize, monitor, and troubleshoot scalable network architectures.
- Explain how networking devices implement QoS.
- Implement protocols to manage the network.
- Explain how technologies such as virtualization, software defined networking, and automation affect evolving networks.

CCNAV7: Bridging

The learner has successfully achieved instructor level credential for completing CCNAV7: Bridging course administered by the undersigned Instructor Trainer. The learner was able to proficiently:

- Configure WLANs using a WLC and L2 security best practices.
- Explain how vulnerabilities, threats, and exploits can be mitigated to enhance network security.
- Explain how VPNs and IPsec secure site-to-site and remote access connectivity.
- Explain how network automation is enabled through RESTful APIs and configuration management tools.
