Faculty Development Program –on "Project Oriented Lab"

28rd feb, 2020

Department of ECE Group IV organized a "Faculty Development program on "Project oriented lab course", on 28 February 2020 for faculty of Group IV. Training is given by the lab incharge Mr. M.Anand of ECE Department. Through this program, Group IV faculty was trained in various aspects like assembly language programming for microcontrollers, execution using software's (KEIL) and hardware kits 8051, ARM-7, Arduino, Node MCU and Raspberry pi. 8 faculty members have attended this program and performed the experiments as per Autonomous syllabus requirements

Participants:

1. Mrs. M Anand
2. Mr. Ch Sandeep
3. Ms.M.Laxmi
4. Ms. G Sree Lakshmi

Objectives:

Develop ability to

- ***Write Python Programs.***
- ***To Interface different sensors with Raspberry Pi.***
- ***Send the sensor data to the cloud using ThingSpeak, Adafruit etc.,***

- ***Send the sensor data to the file and reading the same from the file.***
- ***Use Raspberry Pi and applications using it.***

Aim of the Programme:

The main objective for conducting this in-house FDP is to make the faculty to get updated with latest trends in the technology with Raspberry Pi, and it's Application in IoT.

Totally Seven faculty members from the department has participated in the program.

Day-wise activities:

Day-1: 15th October 2019 (Tuesday)

On day -1 Mr. Ch Sandeep has given the explanation about the Raspberry-Pi Hardware module. That **Raspberry Pi** is a small single board computer. By connecting peripherals like Keyboard, mouse, display to the **Raspberry Pi**, it will act as a mini personal computer. **Raspberry Pi** is popularly used for real time Image/Video Processing, IoT based applications and Robotics applications. In the afternoon session how to write the program in Raspberry Pi using PYTHON (IDLE) was explained. Using this knowledge the participants has developed a small application of controlling traffic light at Y-Junction.

About the College

Geethanjali College of Engineering and Technology (GCET) was established in the year 2005 under the aegis of Teja Educational Society with a sole objective of providing quality technical education accessible and affordable to youth of our nation. The college has excellent infrastructural facilities and modern laboratories supported by highly competent and dedicated faculty. College has been recognized as an R&D centre by Scientific and Industrial Research Organization (SIRO). The college offers Undergraduate programs in engineering branches, namely, CSE, IT, ECE, EEE, ME and CE with a total intake of 900students. Four of its undergraduate programs, namely, CSE, ECE, EEE and ME have been accredited by NBA. The college was conferred "Autonomous" status by UGC with effect from AY 2016-17. The college has been accredited by NAAC with 'A' grade. It has got ISO 9001:2008 certifications. The college also offers postgraduate program in MBA with an intake of 60 students and M.Tech program with Computer Science specialization in department of CSE. It has been sanctioned sponsored research projects from UGC, DST, DRDO and JNTUH-TEQIP. The college has also been granted funds for EDC, FDPs and MODROBS by AICTE. More than 80% of eligible students are placed in several MNCs. College has entered into MoUs with several reputed organizations for mutual benefits such as students projects, expert lectures, industrial visits, consultancy etc.

About ECE Department

The Department of Electronics and Communication Engineering (ECE) was started in the year2005 with an initial intake of 60 students. Right from its inception it is continuously striving to impart quality education and promoting competitive spirit among students for academic excellence. The intake was enhanced to 240 w.e.f 2013-14 academic year. The department has well equipped laboratories, good infrastructure, highly qualified and experienced faculty. A good number of research papers are published by the faculty in National/International conference proceedings/Journals. The department has signed MOUs with various organizations to provide real time training to the students. The department has successfully completed two DST sponsored research projects. It also has two ongoing research projects sponsored by DRDO. The department was sanctioned project under MODROBS by AICTE and is under execution. The department has received patents in the field of image processing and microwave engineering. The department is extending research consultancy services to M/S VEM Technologies Pvt. Ltd. in the field of microwave engineering.

A Report on

FDP on Mobile Application Development

Objective: to provide the faculty with an understanding of Mobile application development

Outcome: Faculty worked on Mobile application development and deployment

Geethanajli College of Engineering and Technology has conducted a one week Faculty development program on **Mobile Application Development** .

After much discussion and deliberation within the faculty of CSE to recognize the recent advances in technology and its outreach for pursuing research and guiding the students to do project based learning, the faculty have come up with the need of organizing a one week faculty development program on the recent advances in computer science and information technology areas.

The FDP was inaugurated by Dr. Udaya Kumar Susarla, Principal, Dr.DSR Murthy, Head, Department of Computer Science and Engineering, **Ms.D.Kamatchi Devi,**Sr.Technical **Trainer,** ICT Academy
The keynote speech by Dr G.Udaya Kumar Susarla,has highlighted the concerns about the raising technological changes and the need for the faculty to adapt to these changes, he also advised all the faculty to take part and participate actively in the FDP..

Around 31 faculty has participated actively in one week FDP and has also worked on few projects given by the expert. she has covered following points in sessions.

Mobile Application Device platforms, Mobile Application Front end, Mobile application Back end and comparing native versus Hybrid applications.

Vote of Thanks was rendered Ester varma, Associate Professor, Dept of CSE, GCET.

ABOUT THE INSTITUTION

Geethanjali College of Engineering & Technology has been structured to take a quantum leap on the changing trends of technology. The need of setting up the college emerged when no other college could fulfill the aspirations of a student in his/her endeavor to acquire wholesome education. The college has its strength lying in its principles of providing the right learning environment for the student. The campus epitomizes the Geethanjali motto, "Striving Towards Perfection" in providing the best of infrastructure, ambience and quality faculty. The college is recognized as Scientific and Industrial Research Organization (SIRO) by the Directorate of Scientific and Industrial Research (DSIR) - New Delhi.It is NAAC accreditated with 'A' grade. Three programs, B.Tech.(CSE), B.Tech.(ECE) & B.Tech.(EEE), of GCET are accredited by NBA, New Delhi.

At Geethanjali, perfection is a passion.

ABOUT THE DEPARTMENT

The Department of Computer Science and Engineering was established in the year 2005 and currently offers an Under Graduate program B.Tech in Computer Science and Engineering with an annual intake of 240 students and 1 Post-Graduate program M.Tech in Computer Science and Engineering with an annual intake of 30 students.

The Department is headed by Prof. D. Sree Rama Chandra Murthy is having a total experience of 33 years in Teaching and Research. Accomplish career demonstrating consistent success as an administrator and educator at the graduate and post-graduate education levels. He is an effective communicator with excellent planning, organizational, and negotiation strengths as well as the ability to lead, reach consensus, establish goals and attain results.

There are 9 Professors, 14 Associate Professors, and 52 Assistant Professors in the department for UG. The department has 14 Programmers and 5 System Administrators to assist and maintain the computer laboratories. All the faculty members are encouraged to participate in Faculty Development Programmes, Conferences, Workshops, Publication of Research Papers and active involvement in R & D activity.

IoT with Python:

Python has its own importance in IoT. However, there are different other languages used in this purpose like Assembly, C, B#, C++, PHP, JavaScript, Java, Rust, and others. IoT has its own importance in Data Analytics, Wireless Sensor Networks, Big Data, Cyber-Physical Systems, and Machine Learning. This language is very focused on real-time processes and analytics.

Python is frequently used by developers as it is more flexible than Java or C. It has been a great resource for Web application development. It is best for IoT projects as it supports embedded programming. Python has achieved great traction in IoT as it is best for data-intensive developments, especially in managing complex data. In addition, Python source codes are very readable and compact due to its clean syntax. It works smoothly with small devices that have less memory and limited calculation strength.

R-Programming:

Over past several years R has garnered immense popularity among Data science practitioners and it is no surprise that R language is often as referred as lingua franca of Data Science! This Data Science with R course effectively covers basic of R, Statistical predictive modeling through various practical examples and how R will be used in Hadoop (RHADOOP)

FDP on IoT Using Python and R programming, Introduction to Hadoop

Objectives:

The FDP is designed to provide Basic knowledge of IoT using Python, and R programming.

Outcomes: Problem solving and programming capability.

This was the one week FDP on IoT using python, and R programming, organized for faculty of GCET to explore the power and simplicity of python language . This FDP was appreciated by the all faculty, as they were able to add another programming language in their technical skill set.

The following were the resource persons and their topics:

1. IoT with Python by: Y.V.N Phani Kishore Assistant Professor Dept of C.S.E
2. Data Analysis Using R Programming by : J UMA MAHESH Assistant Professor Dept of C.S.E

Total 11 faculty have actively participated in this FDP. The speakers has covered following points in 6 days sessions.

How Python has achieved great traction in IoT as it is best for data-intensive developments, especially in managing complex data. In addition, Python source codes are very readable and compact due to its clean syntax. It works smoothly with small devices that have less memory and limited calculation strength. It is best for IoT projects as it supports embedded programming.

The Data Science with R effectively covers basic of R, Statistical predictive modeling through various practical examples and how R will be used in Hadoop.

The FDP was concluded by taking feedback about the programme from the participants which was followed by the issuing of certificates to all the participants by the HOD, Dept of CSE.

Introduction to PBL workshop

The first workshop to introduce Problem Based Learning (PBL) to the faculty of GCET was conducted on 4th and 5th January 2020 in the college by Dr.Vikas Shinde. Fifty five (55) faculty from all departments attended the same. Dr.Vikas introduced the concept of PBL to the faculty and oriented the faculty about the importance of identifying the problem for a given course. The faculty prepared a problem canvas categorizing the different aspects of the identified problem. Dr.Vikas encouraged the faculty to present their work.

The faculty were divided into groups. Dr.Vikas the basic principles of PBL. The faculty worked on the PBL canvas for two days. Each group was asked to give a presentation regarding their canvas.

A Report on

PBL Workshop

Objective—Faculty can use PBL extensively as their primary instructional method

Outcome- Faculty able to identify a problem statement

This was the two days' workshop on PBL organized for faculty of GCET. Total 11 faculty have actively participated in this workshop. The guest speaker: Dr.Vikas, Professor, Viswanikethan.

Project-based learning (PBL) is a model that organizes learning around projects.PBL can promote the development of critical thinking skills, problem-solving abilities, and communication skills. It can also provide opportunities for working in groups, finding and evaluating research materials, and life-long learning

He has covered following points in 2 days session

Any subject area can be adapted to PBL with a little creativity. While the core problems will vary among disciplines, there are some characteristics of good PBL problems that transcend .The problem must motivate students to seek out a deeper understanding of concepts.

The problem should require students to make reasoned decisions and to defend them. The problem should incorporate the content objectives in such a way as to connect it to previous courses/knowledge.If used for a group project, the problem needs a level of complexity to ensure that the students must work together to solve it.If used for a multistage project, the initial steps of the problem should be open-ended and engaging to draw students into the problem.

Design and Development of Course Level Project Based Learning (CL-PBL) Curriculum

Day 1	Time	Activities	Material needed
Session-1	10:00 am to 11:30 am	Revision of PBL and PBL canvas/ Recreation of PBL canvas/ Problem Identification	Original/New canvas/ Workbook and sheet for PBL canvass
		Tea Break	
Session-2	11:45 am to 01:15 am	Principles and elements of PBL Curriculum Design Vishwaniketan PBL Models	Workbook and sheet for Curriculum Design Canvass
		Lunch Break	
Session-3	02:00 pm to 03:30 pm	Designing a PBL Course	Curriculum Design Canvass, sketch pens and sticky notes of different colour
		Tea Break	
Session-4	03:45 am to 04:45 pm	Designing a PBL Course	Curriculum Design Canvass, sketch pens and sticky notes of different colour
		End of the day	
Day 2	Time	Activities	Material needed
Session-5	09:30 am to 11:30 am	Assessment Design	Curriculum Design Canvass, sketch pens and sticky notes sticky notes of different colour
		Tea Break	
Session-6	11:45 am to 01:15 am	Rubric for Assessment	Curriculum Design Canvass, sketch pens and sticky notes sticky notes of different colour
		Lunch Break	
Session-7	02:00 pm to 03:30 pm	CL-PBL Posters Presentation	Curriculum Design Canvass, sketch pens and sticky notes sticky notes of different colour
		Tea Break	
Session-8	03:45 am to 04:45 pm	Empathy Map Creation and production of Learning Material	Curriculum Design Canvass, sketch pens and sticky notes sticky notes of different colour

Course level PBL orientation Workshop

In continuation to the first workshop, a course level PBL workshop was conducted on 24th and 25th January 2020. The same faculty from the first workshop attended the same. In this workshop the aspects of implementation of PBL for a particular course was introduced. Each department identified two courses for PBL implementation in the first semester of academic year 2020-21. The faculty learnt the concept of storyboard for a course. The course level PBL canvass helped the faculty to identify and create a clothes line model for a particular problem.

A Report on

PBL Workshop

Objective—Faculty can use PBL extensively as their primary instructional method

Outcome- To enable the faculty to apply concepts of the semester subjects in the form of a design project based on certain application.

This was the two days' workshop on Project Based Learning organized for Faculty of GCET. The event started with invocation song followed by a welcome address. The session was preceded by a short talk by the Principal of GCET. In his talk he emphasized the importance of Project Based Learning.

The following were the resource persons:

Dr.Sandeep S.Inamdar, Vice-President, Viswanikethan
Dr.Vikas, Professor, Viswanikethan

Project-based learning (PBL) is a model that organizes learning around projects. Project Based Learning, is an instructional approach built upon learning activities and real tasks that have brought challenges for students to solve.

Topics covered on two days

- A definition of Project-Based Learning,
- Underpinnings of PBL research and practice,
- Evaluative research: research on the effectiveness of PBL,
- Implementation research: challenges associated with enacting PBL,
- Intervention research: research on improving the effectiveness of PBL,
- Future directions for PBL research.

Dates	Topics
25/5/2020	1.Introduction to Artificial Intelligence 2. Machine Learning, Categories of ML 3.When and Where AI & ML are Useful 4.Basic Statistics
26/5/2020	1. Supervised Machine Learning Algorithms 2.Decision Trees 3. Naive Bayes Classifier
27/5/2020	Machine learning algorithms: 1. Regression 2.KNN 3. K-means algorithms
28/5/2020	PCA Method in Machine Learning Algorithms: 1. Introduction to Dimension Reduction 2. Dimension Reduction Techniques 3. Principal Component Analysis 4. PCA Algorithm 5. Practice problems based on principal component analysis 6. Implementation of Principal Component Analysis with NumPy.
29/5/2020	1. Computer Vision Introduction. 2. Image Classification and object detection. 3. Depth Architecture of Convolutional Neural Network. 4. Small Introduction to CV2 package using Python. 5. Future Research scope in Computer Vision Techniques.
30/5/2020	1. Machine learning on cloud: benefits 2. Machine learning as a service: providers 3. Machine learning on AWS: demonstration Case study 1: Amazon Recognition for image and video analysis Case study2: Amazon Transcribe: Speech Analysis Case study3: Amazon Sage maker: fully managed machine learning modeling with Jupyter.

"The purest case of an intelligence explosion would be an Artificial Intelligence rewriting its own source code. The key idea is that if you can improve intelligence even a little, the process accelerates. It's a tipping point. Like trying to balance a pen on one end – as soon as it tilts even a little, it quickly falls the rest of the way." **~Eliezer Yudkowsky.**

A Report on

One week National level Online Faculty Development program on Introduction to Artificial Intelligence and Machine Learning

One week Faculty Development Program on "Introduction to Artificial Intelligence and Machine Learning " was conducted by the Department of Computer Science and Engineering from 25-05-2020 to 30-05-20.

The topic was selected so as to promote awareness in the contemporary technologies in the IT Industry. The FDP aimed to provide opportunities to faculty members and research scholars so as to enrich their teaching skills and research ideas in machine learning and their applications in image processing, natural language processing and other domains. The program also intended to develop the knowledge of participants in simulation with advanced software in the relevant fields of computer science. There were 545 participants from various institutions who included faculty members and research scholars.

Topics covered on five days

Day 1 - Introduction to Artificial Intelligence ,Machine Learning, Categories of ML ,When and Where AI & ML are Useful ,Basic Statistics

Day 2- Supervised Machine Learning,Decision Tress, Naive Bayes Classifier

Day 3- Regression,KNN,K-Means algorithm

Day 4- PCA Method in Machine Learning Algorithms: Introduction to Dimension Reduction ,Dimension Reduction, Techniques,Principal Component Analysis , PCA Algorithm, Practice problems based on principal component analysis , Implementation of Principal Component Analysis with NumPy.

Day 5- Computer Vision Introduction:Image Classification and object detection, Depth Architecture of Convolutional Neural Network, Small Introduction to CV2 package using Network, Python. Future Research scope in Computer Network, Vision Techniques

Day 6- Machine learning on cloud: benefits, Machine learning as a service: providers, Machine learning on AWS: demonstration, Case study 1: Amazon Recognition for image and video analysis , Case study2: Amazon Transcribe: Speech Analysis , Case study3: Amazon Sage maker: fully managed machine learning modeling with Jupyter

Vote of Thanks was rendered Ester varma, Associate Professor, Dept of CSE, GCET.

Report

A one-week online FDP on **"The Use of Virtual Physics Labs- Creating Next Generation Teachers"** was conducted between May 20 – 24, 2020 using the Zoom platform.

The pandemic "COVID-19" made all the colleges shut down due to the lockdown and faced all teachers and students having to learn a new way of teaching-learning methodology by conducting online classes.

To create the awareness among the college faculty to learn & perform virtual experiments using the available resources of MHRD, Govt. of India virtual labs Geethanjali College of Engineering and Technology has taken initiative in this regard and organized a one-week online faculty development program.

More than 1000 participants registered for the FDP. Renowned faculty from IIT Hyderabad, NIT Warangal, JNTU Hyderabad as well as in-house faculty trained the participants using the virtual labs developed by MHRD, Govt. of India, and faculty of Physics of GCET how to conduct various physics lab experiments using virtual labs.

Feedback from all the participants was collected using google form and found that the FDP had given all the useful information on how to use the available resources.

After successful completion of the FDP, all eligible faculty members were given participation certificates.

Faculty members from all over the country benefited from this FDP.

Report on One Week Online Staff Development Programme
Organized by Department of Freshman Engineering and Centre for Soft Skills Development
27th April to 4th May, 2020

Online Staff Development Programme was organized primarily to enhance basic language skills, both spoken and written of the non teaching staff working across all the departments.

Speaking and Writing activities were conducted on Google Meet. The participants participated in all the activities enthusiastically and exhibited lot of interest in learning the job specific skills.

Fifty two participants filled the Google form and invited the initiative. However, due to network problems, many of the participants could not join the classes. Nevertheless, fifteen participants showed lots of enthusiasm and participated actively in all the activities during and after the class.

Presently, the training is given through EDMODO- A Learning Management System. Nine staff members have joined the EDMODO.

I thank Dr.G.Neeraja Rani, Head, Freshman Engineering who readily accepted the proposal and has been constantly supporting me in this endeavour. I thank Dr.N.Subhadra, Associate Professor of Mathematics, who has provided a lot of background support in all aspects for successful completion.

Feedback on One Week Staff Development Programme
Organized by Department of Freshman Engineering
April 27th to May 4th 2020
General Observations of the Facilitator

The participants are enthusiastic learners and eager to improve their skills. Most of the participants have committed mistakes in using appropriate tense, verbs and subject verb agreement. These mistakes are identified in both speaking and writing tasks.
