Geethanjali College of Pharmacy

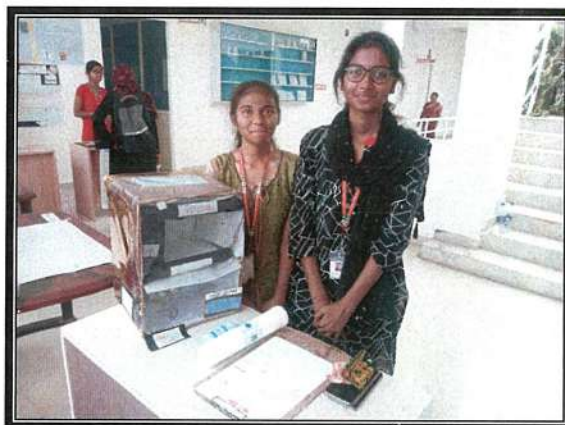

Approved by AICTE, PCI New Delhi, Permanently Affiliated to JNTUH & B.Pharmacy Accredited by NBA
Recognized Under UGC Section 2F & 12B of UGC Act, 1956, by DSIR-SIRO & HI/BI of MSME,
Certified by ISO 9001:2015

Cheeryal (V), Keesara (M), Medchal-Malkajiri Dist, Telangana State- 501301.

STUDENT CENTRIC LEARNING METHODS

MODEL MAKING

Teaching learning process practiced with the objective of outcome based learning at Geethanjali College of Pharmacy. Institute conducting every year a national level seminar DRAVYAKA to strengthen teaching learning process and to improve professional competency in students. Various models and live experiments were exhibited by different departments of B. Pharmacy, M.Pharmacy, Pharm.D students in Dravyaka- 2021

Models of various departments presented by B.Pharmacy, M.Pharmacy, and Pharm D students at DRAVYAKA 2021 organized by GCPK.

INDUSTRIAL TRAINING

- Industrial training is to expose students to real work environment & experience at the same time, to gain the knowledge through hands on observation and job execution. From the industrial training the students will also develop skills and work ethics, communication management and others. Moreover, this practical training program allows students to relate theoretical knowledge with its application in the manufacturing industry.
- According to curriculum of a four-year integrated degree course of bachelor of pharmacy students have to undergo practical training for a period of four week various in pharmaceutical industries in India. As it is to be done during the summer vacation of 3rd year B.Pharmacy.

One month training program of III/IV B.Pharmacy students at RASHMI PHARMA PVT.LTD Cherlapally, IDA, Hyderabad

ASSIGNMENTS

Assignments are the part of the curriculum and part of the internal evaluation process. In every semester assignments are given to students on different topics from each unit of course as per prescribed syllabus. Five Marks are allotted for assignments as a part of internal assessment. In each semester two assignments are submitted by the students.

Sl. No.	Assignment No.	Page No.	Date		Signature of Student	Marks obtained	Signature of Staff	Remarks

Assignment 2
 - General Principles of Chemotherapy
 Write in detail about pharmacology of antimicrobials
 General principles of Chemotherapy
 Chemotherapeutic agent should be able to kill and inhibit the growth of microorganisms and also they should be able to reach the site of infection and should not be toxic to the host.
 It should be able to reach the site of infection and should not be toxic to the host.
 The history of chemotherapy may be divided into 3 parts
 a) In search of natural sources
 b) Chemical synthesis of new and more effective compounds
 c) The modern era of chemotherapy
 The phenomenon of antibiotic was discovered by penicillin in 1929 which is a natural product. It was first used to treat bacterial infections in 1941. Penicillin was discovered by Alexander Fleming in 1928. It was first used to treat bacterial infections in 1941. Penicillin was discovered by Alexander Fleming in 1928. It was first used to treat bacterial infections in 1941.

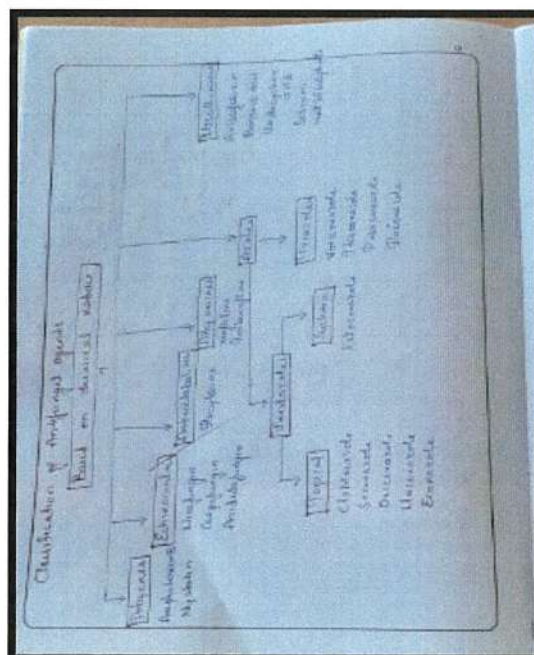

Find 100 natural sources & explain the mechanism of action of penicillin
 - Penicillin is a natural product of the fungus Penicillium notatum.
 - It is a beta-lactam antibiotic.
 - It acts by inhibiting the synthesis of the cell wall of the bacteria.
 - It is effective against Gram positive bacteria.
 - It is not effective against Gram negative bacteria.
 - It is not effective against Mycobacterium tuberculosis.
 - It is not effective against viruses and fungi.
 - It is not effective against protozoa.
 - It is not effective against helminths.
 - It is not effective against parasites.
 - It is not effective against cancer cells.
 - It is not effective against HIV.
 - It is not effective against AIDS.
 - It is not effective against malaria.
 - It is not effective against dengue.
 - It is not effective against typhoid.
 - It is not effective against cholera.
 - It is not effective against shigellosis.
 - It is not effective against amoebiasis.
 - It is not effective against giardiasis.
 - It is not effective against cryptosporidiosis.
 - It is not effective against toxoplasmosis.
 - It is not effective against coccidiosis.
 - It is not effective against leishmaniasis.
 - It is not effective against trypanosomiasis.
 - It is not effective against leishmaniasis.
 - It is not effective against trypanosomiasis.

Classification of Antifungal Agents
 Based on site of infection

<p>Systemic Infection</p> <ul style="list-style-type: none"> Mykamine Griseofulvin Terconazole Onychomycosis 	<p>Systemic Subcutaneous Infections</p> <ul style="list-style-type: none"> Amphotericin B Terconazole Terconazole Terconazole
---------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Pharmacokinetics

- Yellowish colored powder
- Insoluble in aqueous solution
- Given through IV route in salt form along with Propofol/other anaesthetics
- * administered in liver
- * 2% - 10 days
- Severely bound to plasma proteins & is distributed throughout the body
- Diffusion into CSF is poor, but little of it may be in the CSF, which however is amphoteric fluid

PRACTICE SCHOOL

Practice school Enable students to acquire knowledge by applying the practical skills they possess, in unfamiliar, open-ended real life situations and also the practice school will provide excellent skills to put the students in main core. In the IV year I semester every student shall undergo a practice school schedule for a period of 150 hours evenly distributed throughout the semester. The practice school report shall be evaluated for 100 marks and grade point shall be awarded.

METRONIDAZOLE

NITRO-IMIDAZOLE Derivative

ANTI-PROTOZOAL

MOA

Find H₂O
 Contaminated with Fecal
 Materials
Metronidazole

Nitroimidazole Active Metabolites
 → Toxic derivatives
 → Toxicity

Cyst passes through
 → Liver
 → Blood stream

CONTRAINDICATION

- Alcohol Intolerance / Intoxication
- Pregnancy / Lactation
- Alcoholism
- Chronic Pulmonary Disease stage II (COPD)
- Exacerbated symptoms
- Absence of all types of acute and chronic meningitis
- Pregnancy or lactation on oral or IV
- Acquired Intolerance / Intoxication
- Hypersensitivity to nitroimidazole
- Oral administration of the drug in patients with a known or suspected lower GI obstruction

Disrupts DNA
 → Disrupts DNA
 → Disrupts DNA
 → Disrupts DNA

Side Effect

- Oral candida
- Angedema
- Pyrexia, Headache
- Cramps, Diarrhea
- Tachycardia
- Anemia
- Inflammatory lesions of the GI tract
- Ulcerative gingivitis / Stomatitis
- Metronidazole + Alcohol → Disrupts DNA

ANTI-HYPERTENSIVE DRUG

TELMISARTAN + AMLODIPINE (TELMINOCK-AM)

AT-II RECEPTOR ANTAGONIST + CALCIUM CHANNEL BLOCKER

VASODILATOR
 → Reduction of peripheral resistance
 → Reduction of afterload on ventricle
 → Reduction of blood pressure

MOA

↓ Blood pressure
 → Vasodilation
 → Relaxation of smooth muscle
 → Relaxation of smooth muscle
 → Relaxation of smooth muscle

CONTRAINDICATION:

- Pregnancy / Lactation
- Hypersensitivity to telmisartan or amlodipine
- Severe renal impairment
- Severe hepatic impairment
- Concomitant use of other antihypertensive drugs

ROUTE: Oral
DOSE: 20mg Telmisartan / 5mg Amlodipine
ONSET: 1-2 hours
ELIMINATION: 12-14 hours

ESOMEPRAZOLE MAGNESIUM & DOMPERIDONE

MECHANISM OF ACTION

esomeprazole is a combination of esomeprazole and domperidone
 Esomeprazole inhibits the H⁺K⁺ ATPase enzyme (pumps H⁺ into lumen) which is responsible for gastric acid secretion in the parietal cells of the stomach and irreversibly blocks the final step of acid secretion
 Domperidone: stimulates gastric emptying by blocking the action of dopamine and gastric emptying
 → stimulates stimulates gastric emptying by acting as a competitive antagonist of dopamine D₂ receptors

THERAPEUTIC USES

- acidity
- heart burn
- Gastro-intestinal reflux disease
- indigestion, gastric dyspepsia
- nausea, vomiting, dyspepsia
- peptic ulcers

CONTRAINDICATIONS

- allergy
- Tumor of Proliferating gland
- liver disease
- moderate to severe hepatic impairment

SIDE EFFECTS

- dry mouth
- stomach pain
- dizziness
- headache
- constipation

LEVOCETIRIZINE

CLASS: Antihistamine / H1 antagonist

DRUG: Levocetirizine

MECHANISM OF ACTION: Antagonist to histamine H1 receptors. Competitive inhibition of histamine.

THERAPEUTIC USES

- Allergic rhinitis
- Allergic conjunctivitis
- Skin itching
- Hives
- Itchy throat
- Itchy nose
- Itchy eyes
- Itchy ears
- Itchy skin
- Itchy scalp
- Itchy hair
- Itchy eyelids
- Itchy eyebrows
- Itchy forehead
- Itchy neck
- Itchy chest
- Itchy back
- Itchy arms
- Itchy legs
- Itchy feet
- Itchy hands
- Itchy fingers
- Itchy toes
- Itchy nails
- Itchy hair
- Itchy skin
- Itchy scalp
- Itchy hair
- Itchy eyelids
- Itchy eyebrows
- Itchy forehead
- Itchy neck
- Itchy chest
- Itchy back
- Itchy arms
- Itchy legs
- Itchy feet
- Itchy hands
- Itchy fingers
- Itchy toes
- Itchy nails

CONTRAINDICATIONS:

- Hypersensitivity to cetirizine or levocetirizine
- Hypersensitivity to any of the excipients
- Pregnancy / Lactation

Pharmacokinetics:

- 50% absorbed by oral administration
- Metabolized in liver
- Excreted in urine
- Half-life: 8.7 hours
- 50% excreted in urine
- 50% excreted in urine

OSLTAMIVIR

CLASS
 Anti-viral
 Neuraminidase inhibitor

INDICATIONS
 Influenza A, B and
 H1N1 virus
 Prophylaxis of influenza
 Recommended for use
 in high risk patients

MECHANISM OF ACTION
 Inhibits neuraminidase enzyme
 with result of less virus
 attachment and release
 → Less infectivity virus
 → Less viral load
 → Less viral multiplication

PHARMACOKINETICS
 A rapidly absorbed from
 GIT least and converted to
 inactive diastereoisomer
 E is eliminated by renal
 excretion
 Half life - 10 hrs
 (active isomer)

CONTRAINDICATIONS
 Hypersensitivity to
 Osetamivir or any of
 its components
 • severe allergy
 • severe liver
 • severe kidney

SIDE EFFECTS
 Abdominal
 discomfort
 Nausea
 Vomiting
 Diarrhoea
 Headache
 Dizziness
 Fatigue
 Rash
 Allergic reaction

CASE STUDY LEARNING

Pharm.D students are playing a vital role in bridging the gap between the physician and patient by providing various clinical services using their clinical knowledge and practice skills. Case studies are written descriptions of an intensive study about a patient's real-life problem or pre-defined case scenarios. The details of the patient present history, past history, social history, allergic history, etc which are encountered during the ward round and patient interaction are noted. The students are actively involved in the analysis of the collected case, reviewing subjective-objective parameters of the patient, analyzing the provisional diagnosis, differential diagnosis, and comparing the treatment chart with given standard treatment guidelines. The case study learning will primarily help the students to develop skills of critical thinking, decision making, problem-based learning to generate an in-depth understanding of a complex issue in real life context, to rule out the possible drug-drug interactions, drug-food interactions, drug interventions, cost benefit analysis & ADR's. The use of case studies and other clinical activities will enhance the development of essential skills necessary to practice in any setting of the health care system, manage care pharmacy, community pharmacy, hospital pharmacy.

PROJECT BASED LEARNING

Project Based Learning is a teaching method in which students gain knowledge and skills by working for an extended period of time to investigate and respond and engage a complex question, problem, or challenge. Project based learning is a student centered pedagogy that involves a dynamic classroom approach in which students acquire a deeper knowledge through active exploration of real-world challenges and problems. Students learn about a subject by working for an extended period of time to investigate and respond to a complex question, challenge or problem so every year IV B. Pharmacy and II M. Pharmacy students are allotted with a project under the guidance of faculty to be completed within an academic year. Marks are allotted for projects according to their project results, presentation and viva-voce. Research and review articles of their projects are published by students in various national and international journals.

RESEARCH ARTICLE

A Prospective Comparative Study on the Efficacy of Chlorzoxazone, Ibuprofen and Paracetamol versus Thiochloridose, Aceclofenac and Paracetamol in Patients with Acute Lower Backache: A Tertiary Care Hospital

Athalya Divya¹, Bharajuni Ramya¹, Maddapuram Manasa¹, Varsha Madasi², Karthik R. Naga Kishore²

Abstract: The evaluation of VAS for muscle relaxation... provided in the management of acute low back pain...

INTRODUCTION

Low back pain (LBP) is a considerable health problem... It is usually defined as pain, muscle spasm or stiffness localized below the second lumbar vertebrae and above the anterior pelvic fold...

examined for chronic or post-traumatic pain... A study of a randomized trial of a VAS (VAS) with a 10-cm ruler and a number that the patient assigns to the pain...

The visual analog scale (VAS) is a valid and reliable measure of chronic pain intensity...

Chlorzoxazone, a central muscle relaxant, acts primarily through its VAS effect...

Conclusion: A central muscle relaxant acts primarily through its VAS effect...

Keywords: Lower Back Pain, VAS, Chlorzoxazone, Ibuprofen, Paracetamol, Thiochloridose, Aceclofenac

Source: B.Pharmacy Practice-3, 2023, Issue 3, 103-107
